PROFESSIONAL SUMMARY

Results-driven Computer Science & Networks engineering student with strong foundation in network design, routing protocols, and VoIP technologies. CCNA-certified with hands-on experience in Cisco Packet Tracer, cloud networking, and IoT systems. **Awarded official Google Cloud Swag kit directly by Google** for completing 300+ cloud skill badges. Passionate about troubleshooting complex network bottlenecks and architecting scalable enterprise solutions.

EDUCATION

Presidency University, Bengaluru

Bachelor of Engineering in Computer Science (Networks)

Expected Graduation: June 2027

Bengaluru, India

Diamond PU College, Basavakalyan

Pre-University Course (PUC I & II) – PCMC

2021 – 2023

Karnataka, India

TECHNICAL SKILLS

Networking Protocols: TCP/IP, OSI Model, IPv4/IPv6 Addressing, Subnetting (VLSM), RIP, OSPF, BGP basics, VLANs (802.1Q), STP, VoIP, QoS, Network Troubleshooting

Tools & Platforms: Cisco Packet Tracer (Advanced), Google Cloud Platform (GCP), Linux / Ubuntu, Raspberry Pi, Wireshark Packet Inspection

Cloud & Infrastructure: Cloud Networking, VPC Configuration, Peering, Firewall Policies, Network Security Basics

Programming Languages: Python, C++, HTML5, CSS3, JavaScript

PROFESSIONAL EXPERIENCE

Pinnacle Labs

Data Science Intern

Remote

Internship

- Developed an intelligent Customer Support Chatbot using Python and NLP, processing 100+ customer queries daily with **85%+ response accuracy**.
- Optimized chatbot responses through machine learning model tuning and automation logic implementation, **reducing response turnaround time by 30%**.
- Worked with large-scale datasets, performing rigorous data cleaning, feature engineering, and statistical performance analysis.

KEY PROJECTS & ACHIEVEMENTS

VoIP Network Implementation – Cisco Packet Tracer

Cisco CME Topology

- Designed and deployed a fully functional enterprise VoIP network topology supporting **20+ IP phones** across multiple departments.
- Configured routers, switches, VLANs, IPv4 addressing scheme, and integrated Cisco Call Manager Express services with **99.2% uptime**.
- Tested voice transmission quality, resolved packet latency issues, and documented complete network configuration for future maintenance.

Campus Network Design – Multi-Building Infrastructure

Enterprise Architecture

- Architected a campus-wide network supporting **500+ devices across 3 buildings** with high-availability redundancy and failover mechanisms.
- Implemented dynamic routing using RIP and OSPF protocols; validated network connectivity with **98.5% packet delivery success rate**.
- Configured and managed centralized HTTP, DNS, and multi-scope DHCP services; performed load testing and network performance optimization.

Underwater Marine Life Tracking System – IoT Solution

Raspberry Pi & Sensors

- Developed IoT-based tracking buoy using Raspberry Pi for real-time marine ecological data collection with **95% sensor calibration accuracy**.
- Integrated wireless communication protocols for data transmission; processed and analyzed sensor telemetry data using Python.
- Designed real-time monitoring and historical telemetry data visualization dashboard.

CERTIFICATIONS & RECOGNITIONS

- **CCNA 200-301 (Network Fundamentals)** – Simplilearn SkillUp | Completed: August 20, 2026
- **Google Cloud Learning Badges (300+ Badges) & Official Swag Award** – Completed 300+ badges in VPC, IAM, and Cloud Security; **awarded official Google Cloud Swag kit directly by Google.**
- **Cisco Packet Tracer Advanced Certification** – Network simulation, enterprise routing, and switching design expertise
- **IBM Dev Day: Bob in Action** – Virtual Event Participation | August 27–30, 2026

CORE COMPETENCIES & SPOKEN LANGUAGES

Core Competencies: Network Design & Architecture • Troubleshooting & Diagnostics • Problem Solving • Team Collaboration • Project Management • Quick Learner • Time Management • Communication • Cloud Infrastructure

Languages: English (Professional) • Kannada (Native) • Hindi (Fluent)
