PROFESSIONAL SUMMARY

Results-driven Computer Science & Networks engineering student with strong foundation in network design, routing protocols, and VoIP technologies. CCNA-certified with hands-on experience in Cisco Packet Tracer, cloud networking, and IoT systems. Awarded official Google Cloud Swag kit directly by Google for completing 300+ cloud skill badges. Passionate about troubleshooting complex network bottlenecks and architecting scalable enterprise solutions.

EDUCATION

Bachelor of Engineering, Computer Science (Networks) | Presidency University, Bengaluru

Expected Graduation: June 2027

Pre-University (PUC I & II) | Diamond PU College, Basavakalyan (2021-2023)

TECHNICAL SKILLS

Networking Protocols: TCP/IP, OSI Model, IPv4/IPv6 Addressing, Subnetting, RIP, OSPF, BGP basics, VLAN, STP, VoIP, Network Troubleshooting

Tools & Platforms: Cisco Packet Tracer (Advanced), Google Cloud Platform (GCP), Linux, Raspberry Pi, Wireshark

Cloud & Infrastructure: Cloud Networking, VPC configuration, Firewall policies, Network security basics

Programming Languages: Python, C++, HTML, CSS, JavaScript

PROFESSIONAL EXPERIENCE

Data Science Intern – Pinnacle Labs (Remote)

- Developed an intelligent Customer Support Chatbot using Python and NLP, processing 100+ customer queries with 85%+ response accuracy
- Optimized chatbot responses through machine learning model tuning and automation logic implementation, reducing response time by 30%
- Worked with large-scale datasets, performing data cleaning, feature engineering, and performance analysis

PROJECTS & ACHIEVEMENTS

VoIP Network Implementation – Cisco Packet Tracer

- Designed and deployed a fully functional VoIP network topology supporting 20+ IP phones across multiple departments
- Configured routers, switches, VLANs, IPv4 addressing scheme, and integrated Cisco Call Manager services with 99.2% uptime
- Tested voice transmission quality, resolved latency issues, and documented network configuration for future maintenance

Campus Network Design – Multi-Building Infrastructure

- Architected a campus-wide network supporting 500+ devices across 3 buildings with redundancy and failover mechanisms
- Implemented dynamic routing using RIP and OSPF protocols; validated network connectivity with 98.5% packet delivery success rate
- Configured HTTP, DNS, and DHCP services; performed load testing and network optimization

Underwater Marine Life Tracking System – IoT Solution

- Developed IoT-based tracking system using Raspberry Pi for real-time marine data collection with 95% sensor accuracy
- Integrated wireless communication protocols for data transmission; processed and analyzed sensor telemetry data using Python
- Designed dashboard for real-time monitoring and historical data analysis

CERTIFICATIONS & RECOGNITIONS

Ethical Hacking & Cybersecurity Workshop – VaultofCodes | Completed: September 20, 2026

CCNA 200-301 (Network Fundamentals) – Simplilearn SkillUp | Completed: August 20, 2026

Cisco Packet Tracer Advanced Certification – Network simulation and design expertise

IBM Dev Day: Bob in Action – Virtual Event Participation | August 27-30, 2026

Google Cloud Learning Badges – 300+ badges completed; recognized with Google swag

CORE COMPETENCIES

Network Design & Architecture • Troubleshooting & Diagnostics • Problem Solving • Team Collaboration • Project Management • Quick Learner • Time Management • Communication • Cloud Computing • English • Kannada • Hindi
